 Open to Full-Time & Contract Opportunities

Profile

Frontend Developer specializing in React and Next.js, with full-stack experience building scalable web applications from frontend to backend. Developed and deployed 20+ production-ready projects, including authentication systems, payment integrations, and real-time applications using React, Node.js, Supabase, and modern web technologies. Passionate about building fast, maintainable, and user-focused products.

Technical Skills

Frontend:

React, Next.js, JavaScript (ES6+), HTML5, CSS3, Responsive UI

React Ecosystem:

React Hooks, Custom Hooks, React Router v6, React Query, Redux Toolkit, Context API, React Hook Form

Styling:

Tailwind CSS, Styled Components, CSS Modules, Responsive Design

Backend:

Node.js, Express.js, RESTful APIs, Supabase (PostgreSQL), MongoDB (Mongoose), Authentication (JWT, OAuth, Magic Link)

Performance & Optimization:

Code Splitting, Lazy Loading, Memoization (useMemo, useCallback, React.memo)

Tools & Workflow:

Git, GitHub, CI/CD, VS Code, Netlify, Render, Vercel

Testing & Debugging:

Chrome DevTools, React DevTools, React Query Devtools, Redux DevTools, React Profiler, Manual Testing, Charles Proxy, Fiddler, STP / STD / STR

AI Development Tools: GitHub Copilot, ChatGPT, Claude (Prompt engineering, debugging, workflow optimization)

Design & Prototyping: Figma, Canva, Midjourney (UI design, visual assets, mockups)

Additional: Python(data analysis) , SQL (JOIN-level), Jira

Experience

Frontend Developer – Anibinge Streaming Platform (Client Project)

 17 2026

A full-stack anime micro-series streaming platform where users can watch episodes, unlock content with coins, and creators can upload and manage their series. Includes authentication, PayPal payments, and HLS video streaming.

- Architected a scalable React frontend using React Router, React Query, Context API, and reusable component architecture
- Integrated Supabase (PostgreSQL) for auth, database, and real-time backend — including Google OAuth, Magic Link, and Apple Sign In
- Built a complete content creator upload system (series, episodes, posters, trailers)
- Integrated PayPal Checkout API for coin purchases and payment verification
- Connected frontend with REST APIs and PostgreSQL backend.
- Optimized performance through lazy loading, code splitting, and memoization
- Connected Bunny.net for media delivery and Vercel for deployment

Tech Stack

React 19, Vite, Node.js, Express.js, Supabase (PostgreSQL), React Query, React Router, HLS.js, PayPal API, Google OAuth, CSS Modules, PWA, Vercel, Render

[Live Demo](#)

Frontend Developer (Personal & Production Projects)

 17 2024 – present

Building modern React and Next.js applications with a focus on performance, scalability, and user experience.

Achievements:

- Developed and deployed **20+ responsive web applications**
- Improved performance using memoization and optimized rendering strategies
- Reduced bundle size through **code splitting and lazy loading**
- Built reusable custom hooks for **API handling, local storage, and UI logic**
- Implemented advanced routing using **React Router v6 (loaders & actions)**
- Applied modern styling techniques using **Tailwind CSS, Styled Components, and**

CSS Modules

- Integrated APIs, authentication flows, and backend services
- Deployed full projects using Netlify, Render, and Vercel

Freelance QA Tester – uTest (Remote)

 2021 – 2024

Execute manual testing across diverse client applications on mobile and web platforms, ensuring quality and reliability before production releases.

Responsibilities:

- Conduct thorough functional, regression, and exploratory testing on web and mobile applications
- Bug reports with reproduction steps, screenshots, and severity assessment
- Collect browser/device logs
- Create annotated screen recordings using ScreenPal, HandBrake, and VSDC for clear issue documentation

Education & Courses

Front-end Development

 2024 – 2026

Structured self-directed learning in modern frontend development with a focus on **React**, **Next.js**, and **JavaScript**, applied through real-world, production-ready projects.

Core Topics:

- **React fundamentals:** JSX, components, props, state, hooks, lifecycle, virtual DOM
- **Next.js:** App Router, layouts, SSR, SSG, ISR, metadata & SEO optimization
- **React internals:** Render phase, Commit phase, reconciliation, browser paint
- **Advanced React patterns:** Compound components, render props
- **State management:** Context API, useReducer, Redux, React Query
- **React Router v6:** Loaders, actions, nested routing, protected routes
- **Performance optimization:** Code splitting, lazy loading, memoization
- **Modern JavaScript (ES6+):** async/await, destructuring, modules, closures
- **Styling:** Tailwind CSS, Styled Components, CSS Modules

Projects:

The Wild Oasis – Guest Booking Website

Customer-facing hotel booking platform where users can browse cabins, sign in with Google OAuth, manage reservations, and update their profiles. Built with a modern Next.js architecture and Supabase backend integration.

Tech Stack

Next.js, React, Tailwind CSS, Supabase, Google OAuth, Next.js App Router, Vercel

[Live Demo](#) | [GitHub](#)

The Wild Oasis – Hotel Management Dashboard

Full-stack hotel management dashboard application featuring authentication, booking management, cabins management, and data visualization.

Tech: React, React Query, Supabase, Styled Components, Recharts,

[Live Demo](#) | [GitHub](#)

Fast React Pizza – Food Ordering Application

Pizza ordering web application with a dynamic menu, cart functionality, and order tracking, focused on performance and state management.

Tech: React, React Router, Redux-Toolkit, API integration, Tailwind CSS

[Live Demo](#) | [GitHub](#)

Personal Portfolio Website

Fully responsive portfolio showcasing selected projects, featuring dark/light mode, smooth scroll animations, and a custom UI/UX design.

Tech: React, CSS Modules, React Router, Supabase

 [Live Demo](#) | [GitHub](#)

Bloomberg Finance Fundamentals – Bloomberg for Education

 2024

Completed comprehensive finance curriculum covering economic fundamentals, financial markets structure, responsible investing principles, risk management strategies, and investment portfolio construction. Gained insights into career pathways in finance and fintech sectors.

 [View Certificate](#)

Python & Data Analysis – ARDC, Tel Aviv

 2022 | ⌚ 40 hours

Mastered core Python programming, data structures, and data analysis using Pandas and NumPy libraries. Completed hands-on projects analyzing real-world datasets.

Projects:

Spotify Songs Dataset (2000–2020) – Analyzed music trends and patterns across two decades. [GitHub](#)

Farmers Market Finder – Built search tool for 7,000+ US markets using geolocation. [GitHub](#)

QA Manual Testing – SV College, Tel Aviv

 2021

Completed intensive training in manual testing methodologies for web and mobile applications. Gained hands-on experience with testing tools and documentation practices.

Skills Acquired:

- Test documentation: STP (Software Test Plan), STD (Software Test Description), STR (Software Test Report)
- SQL fundamentals (JOIN-level queries)

- Testing tools: Jira, Chrome DevTools, Charles Proxy, Fiddler, VPNs, Fake GPS, AVD

Projects Tested:

Trivia – Web-based game application

Digital Layers – Mobile music composition app

Screen Recording – Mobile screen capture application
